All Depends BLOOD Upon the

Your Health is Good or Bad According to the Quality of Your Blood.

Healthy, pure blood and a free circulation is the surest protection against the discomforts and diseases of summer. It is a physical impossibility to be well unless the body is sustained by strong, vigorous blood. All life's forces are kept up, and every organ, tissue and nerve is dependent upon this vital fluid, and there is no such thing as health without a pure and untainted blood supply. Good blood also regulates the temperature of the body by keeping active and healthy the glands and pores of the skin, carrying off with the perspiration the impurities and poisons from the system, the cause of rashes and eruptions of various kinds, bad complexions and red, rough skins, and preventing that overheated and riotous condition of the

blood that so frequently results in sun strokes and prostrations. If you have allowed your blood to become impoverished and run down, then a course of S. S. S. will cleanse, purify and strengthen it, and build up your general health, thus putting the system in the best possible condition to meet and ward off summer sickness.

S. S. S., being purely vegetable, every ingredient working in perfect harmony with nature, has been called Nature's Remedy. Its action upon the blood is gentle yet thorough, completely
